

Mechanical System to Repair Concrete Pools and Slabs

SlabStitch®

**CONCRETE
REPAIR
SYSTEM**

**ST12
Mechanical
Stitches**

Swimming pool professionals searching for proven products and techniques to repair concrete cracks are choosing the **SlabStitch®** concrete repair system. The system is engineered to transfer load away from the crack creating a long-lasting fix. The system works by tightening down the precision mechanical stitch producing tension across the crack and inhibiting the fracture from expanding.

The SlabStitch® Concrete Repair System is an engineered, tested and field-supported product. More and more contractors are choosing **ST12 Mechanical Stitches** to repair concrete prior to resurfacing pools, decks and patios because they provide the optimal combination of strength, installation time, and cost.

CUTAWAY VIEW
